25X1X

1. Sixty Rumanian physicians went to Korea in the Summer of 1951. Most of these were of Hungarian descent or Jews. I know that at least one of these men returned prior to March 1952. I learned this fact from one of his friends.
2. This group of physicians may possibly have taken plasma along with them although I feel that it is improbable that they did so, because of the lack of dried plasma in Rumania.
